

As a retired Naval Flight Surgeon, safety was and is my business. A system such as XM Instant Traffic and Weather is a fool proof way to stay in touch when all other systems may be down. Petitions to stop a system that works to enhance public safety should not be tampered with.

Those that would try to stop XM Instant traffic and Weather DO NOT HAVE THE PUBLIC SAFETY as there primary interest--it is all about profit.

I urget the FCC to support my right to have sattellite news and weather without big businesses trying to stop a valuable service. I can think of 3 times when we were unable to get radio weather but could get XM channels which allowed us to make decisions on routes and destinations that were safer.

Again, stop the maddness of big businesses putting profit ahead of what the people want.

Sincerely, JB Noll, Capt MC USN (Ret)
